

Supritha Maiya

Senior Backend Engineer · Java, Spring Boot, Microservices

suprithamaiya.au@gmail.com · 61 477 579 219 · linkedin.com/in/supritha-maiya · github.com/suprithamaiya

PROFESSIONAL SUMMARY

Senior backend engineer with seven years of experience building and shipping scalable microservices for enterprise SaaS platforms, including the customer onboarding service for Synopsys' Polaris application security platform (now Black Duck, a Gartner Magic Quadrant Leader in Application Security Testing), serving Fortune 500 clients globally. Strong background in security and identity systems (Keycloak, OAuth 2.0, JWT), distributed messaging (RabbitMQ), and enforcing test coverage standards across teams. Recently completed a Master of Business (Data Analytics) at Monash University.

485 Graduate Visa holder with full working rights in Australia, based in Melbourne and open to relocation or contract work nationally.

SKILLS

Programming Languages: Java

Backend and Frameworks: Spring Boot, Hibernate, REST APIs, Maven, Microservices

Security: Keycloak, Spring Security, OAuth 2.0, JWT, RBAC

Data Formats: JSON, XML, Protobuf

Testing: JUnit, Mockito, REST Assured, Selenium

DevOps and Tools: Docker, Kubernetes, Jenkins, Git, GitLab, Datadog, Harness

Messaging and Databases: RabbitMQ, PostgreSQL, MySQL, Liquibase

Collaboration and Tools: Jira, Postman, Swagger, Confluence

PROFESSIONAL EXPERIENCE

Senior Software Engineer · Synopsys India Private Limited, Bangalore Feb 2023 – Jul 2024

- Built the customer onboarding microservice for the Polaris application security platform (now Black Duck, a Gartner Magic Quadrant Leader in Application Security Testing), serving Fortune 500 enterprise clients globally.
- Owned multiple production features end-to-end from MVP scoping through release, delivering against an 85%+ unit and integration test coverage standard enforced across teams.
- Participated in cross-functional architecture discussions, evaluating trade-offs and surfacing implementation risks and edge cases before build-out, helping the team story-point and commit to delivery timelines with confidence.

Software Engineer · Synopsys India Private Limited, Bangalore Jul 2019 – Jan 2023

- Built early-stage components of the Polaris application security platform ahead of MVP launch.
- Automated extraction and processing of security assessment reports for 20+ enterprise clients across multiple risk rating frameworks using Apache APIs, significantly reducing manual reporting effort.
- Designed and maintained event-driven messaging flows using RabbitMQ to handle user lifecycle events, enabling reliable, scalable inter-service communication across a distributed microservice platform.
- Helped migrate legacy monolithic products to a microservices architecture.
- Automated regression testing across multiple features, reducing manual QA effort each release.
- Implemented row-level security for sensitive tables and verified rollback functionality to maintain product integrity.

Software Engineer · Cigital Asia Private Limited, Bangalore Aug 2017 – Jun 2019

- Automated REST endpoints and UI functionality using REST Assured and Selenium, accelerating testing cycles.
- Triaged automation results to identify critical issues early, reducing release risk and improving product quality.

- Monitored CI/CD pipelines to ensure consistent test coverage and smooth deployment.
- Mentored and onboarded 4–6 engineers and interns on automation frameworks, business workflows, and testing best practices, accelerating team ramp-up.
- Presented quarterly delivery reviews to stakeholders, reporting automation coverage, features shipped, and outstanding blocker and critical bugs to track team velocity and quality.
- Supported critical production releases, including UAT testing and on-call coverage during release phases.

EDUCATION

Master of Business, Data Analytics for Business · Monash University, Melbourne Jul 2024 – Jul 2026
Activities: Volunteer at Monash Graduate Association, Monash Association of Coding

Bachelor of Engineering, Information Science and Engineering · Visvesvaraya Technological University, Bangalore Aug 2013 – Jul 2017
Activities: Member of Free Software Movement Karnataka, Quizzing, Skilled in creative writing
